

SKYNET TECHNOLOGIES

Report Date:

November 24, 2023

Evaluation Methods Used:

To measure compliance with WCAG 2.1 guidelines, testing was performed on omniluxed.com website. Testing involves measuring whether or not the elements and content that make up a webpage are reflecting success criterion from the WCAG 2.1 checklist.

Success Criteria are the specific components that a webpage must adhere to in order to succeed for each of the criteria mentioned. The website was tested with two methods:

Automated Testing:

An automated tool is usually a web browser add-on that generates a report when the user submits a webpage address. Such a report would contain a list of errors. For example, a page might have three images that are missing alt-text. Many automated tools were considered for testing websites' accessibility. The tools include Monsido, WAVE and Google Lighthouse.

Please Note: automated testing is effective at detecting some but not all types of accessibility barriers.

Manual Testing:

Manual testing entails a person visiting the website using assistive technology and manually testing it by going through the contents to find accessibility barriers. For example, a user might report that a page has a pop-up dialogue that is not made available to assistive technology and keyboard users.

Manual testing included using a combination of assistive technologies, web browsers, and operating systems. The tools include NVDA, VoiceOver and JAWS.

Applicable Standards/Guidelines:

This report covers the degree of conformance for the following accessibility standards/guidelines:

Standard/Guideline	Included in Report
Web Content Accessibility Guidelines 2.0	Level A – Basic Accessibility (Yes) Level AA – Strong Accessibility (Yes) Level AAA – Advanced Accessibility (No)
Web Content Accessibility Guidelines 2.1	Level A – Basic Accessibility (Yes) Level AA – Strong Accessibility (Yes) Level AAA – Advanced Accessibility (No)

Scope/Pages Tested:

In this report, we have covered all 125 pages of [\[redacted\]](#). Reference: [sitemap.xml](#)

- 62 CMS pages
- 18 Collection pages
- 20 products
- 25 blogs
